II. Confused with ALLEGE *v.*¹ to *lighten* or *alleviate*, both verbs being in 14th c. *alegge*, and both used of *pains*, etc., so that *alegge peine* was in the one sense = *quell* pain, in the other = *alleviate* pain. Both senses might be expressed by *abate*, and they came to be regarded as the same word, so that from *c* 1400 *alaye* was used for *alegge* in both (cf. Caxton's 't' *alegge* thurste,' see ALLEGE *v.*¹ 2, Gower's 't' *to allay* thurst'); and finally *alegge* became obs., and *allay* remained with the combined meaning.

11. To subdue, quell (any trouble, as care, pain, thirst); to abate, assuage, relieve, alleviate.

[*c* 1200 *Ureisun Ure Lefdi* 133 Þu miht lihtliche .. al mi sor aleggen. 1250 LAY. 25684 Al þis lond he wole for-fare: bote þou alegge oure care.] 1393 GOWER *Conf.* III. 21 Which may his sory thurst allay. *Ibid.* III. 273 If I thy paines mighte alaie. 1578 LYTE *Dodoens* 341 The roote Rhodia .. alayeth head ache. 1667 MILTON *P. III. Confused with ALLAY *v.*², to alloy, mix, temper, qualify. The two verbs were from the 15th c. completely identical in form, and thus in appearance only different uses of the same word. (The earlier of the following senses are more closely related to the next vb. than to this; but it is, on the whole, more convenient to place them here, than under a word which is obs. or arch. in its own proper sense.)

†**12.** To temper (iron, steel, etc.) *Obs.*

1429 *Roll for Building Durham Cloisters*, Pro alayng secur', chyselle, wegges. 1486 *Bk. ¶ See at the end of the prec. word, a number of senses combining the ideas of ALLAY, to alloy, or deteriorate, and ALLAY, to put down, abate, reduce, which might equally follow here. When these arose, the two verbs, originally distinct, had come to be viewed as one.

¶ In this sense now represented by Allay *v.*[1] The infinitive and certain other parts of these two vbs. were formally identical in ME., and when *aleggen*, :—OE. *alecgan*, was levelled to *aleye, allay* (as explained under that vb.), this was also substituted for *aleggen* = OFr. *alegier*, giving the modern 'to *allay* hunger, pain, grief, fear': see Allay *v.*[1] II. Spenser has *alegge* as an archaism for *allay*:

1579 Spenser *Sheph. Cal.* Mar., The joyous time now nigheth fast, That shall alegge this bitter blast.

Allege (ălē·dʒ), *v.*[2] Forms: 3–5 **alegg-e, aleg-e**, 4–6 **allegge**, 5–9 **alledge**, 5–6 **adledge**, 6–7 **alledg, aleage, alleage, alleadg, alleadge,**

4– **allege.** [Though *allege* answers exactly in *sense* to L. *allēgāre* and its Fr. adaptation *alléguer*, its soft *g* (dʒ) shows that it is not an adoption of this, which would have given *alleague*. But there was an OFr. *esligier*:—late L. **exlītigāre* to clear at law, of which the Norm. form was *aligier*, *alegier*. This was latinized in England, as *adlēgiāre*, a word in regular use in the laws of the Norman kings (see Du Cange); and this *adlēgiāre* (as if f. *ad lēgem*) was evidently treated also as the equivalent of *aleier* (as if f. *a lei*), the true OFr. descendant of L. *allēgāre* (see ALLAY *v.*[3]). Hence, in later AFr., *alegier* (*aleger*, *alegger*), and its Eng. adoption *alege*, *allege*, though formally descended from *exlītigare*, were used as = L. *allēgāre*. (Cf. the technical use of the latter in Roman Law, in 'adlēgāre sē ex servitūte in ingenuitātem,' to release oneself.. by adducing reasons.) As in Fr. the forensic *alléguer* supplanted the popular *aleier*, so in Eng. *allege* took the place of ALLAY *v.*[3].

Connexion of *alegier* (:—**exlītigare*), *aleier* (:—*allēgāre*), *adlegiāre*, and *alegge*, *allege*:

An annual table, or (more usually) a book of tables, containing a calendar of months and days, with astronomical data and calculations, ecclesiastical and other anniversaries, besides other useful information, and, in former days, astrological and astrometeorological forecasts.

(The 'almanacs' known to Roger Bacon and Chaucer were permanent tables of the apparent motions and positions of sun, moon, and (?) planets, whence the astronomical data for any year could be calculated. 'The calculations [of Regiomontanus, 1475] of the places of the sun and moon were the best that had been made in Europe .. He speaks of them himself as "quas vulgo vocant *almanach*"' (Hallam *Lit. Eur.* 1855 I. 190). In 15th c. almanacs or *ephemerides* began to be prepared for definite periods, as 30 or 10 years, and in 16th c. for the year, with which was combined the ecclesiastical *calendar*; astrological and weather predictions appear in 16–17th c.; the 'useful statistics' are a modern feature.)

[*Note.* As to the origin and history of the word *almanac*:—1. The earliest notices are: 1267 Roger Bacon *Op. maj.* xv. (1733) 290 Antiqui astronomi ponunt principium anni circiter principium Octobris, sicut patet in expositione tabularum, quae Almathec vocantur; *Op. Tert.* xi. (1859) 36 'Has tabulae vocantur *Almanach* vel Tallignum, in quibus .. homo possit inspicere omnia ea quae in caelo sunt omni die, sicut nos in

calendario Inspicimus omnia festa sanctorum'; *c*1345 Giovanni Villani *Cronica* XI. xli, 'Secondo l'almanacco di Profazio Giudeo, e delle tavole Toletane dove essere in detta congiunzione di Saturno e di Giove a dì 20 del detto mese di Marzo' [where the 'Tables of Toledo' (constructed *c*1080 by Arzachel) again point to the Arabs in Spain]. Explanations have been offered of *manākh* from Semitic sources, as Arab. *manay* to define, determine, *manā* measure, time, fate; Heb. *manāh* to allot, assign, count; Arab. *manaḥa* to present, *minḥat* a gift, all of which fail in form or sense or both.

2. Eusebius, *De Præp. Evangel.* iii. 4, quotes Porphyrius as to the Egyptian belief in astrology, in horoscopes, and so-called lords of the ascendant, 'whose names are given in the *almenichiakd* (*ev τοις α μενιχιακοις*), with their various powers to cure diseases, their risings and settings, and their presages of things future.' Notwithstanding the suggestive sound and use of this word (of which however the real form is very uncertain), the difficulties of connecting it historically either with the Spanish Arabic *manākh*, or with med.L. *almanach* without Arabic intermediation, seem insurmountable. Nor does the sense really point to such tables as those described by Roger Bacon, Chaucer, and Regiomontanus.

3. *Manākh* has been identified with a L. *mamcus* or *manachus*, applied in Vitruv. ix. 8 (Dialling) to a circle in a sun-dial showing the months or signs of the zodiac, an origin which would well explain Pedro's word in both senses; but the true reading of Vitruvius's word is now generally agreed to be *menœus* (Gr. *μηνοῖος* monthly); and it has not yet been shown that the reading *manacus* was ever so generally known or accepted, as to make its adoption probable at the hands of any Arab astronomer in Spain. Nor has it been shown to be impossible. Of many other conjectures none are worthy of notice.]

Also (ɔ·lsəo, ɒ·lsəo), *adv.* Forms: 1 all swa, al swá, (WS. eall swá, eal swá), 2 alswa. *North.* 3–7 alswa, 5 allswa, alaswa, 5–6 alsway, 5–7 alsua, alsuay, 4–6 alsa. *South.* 2–3 al swo, 3–5 al so, 5–7 all so, 4– also. *Contr.* (north. and midl.) 4 alse, (alce), 3–7 als, (6 alls). [comb. of All = altogether, wholly + So (OE. *al* + *swā*). Cf. Ger. *also*, Du. *alzoo*. Orig. an emphasized expansion of *so* (cf. *al-though*, *all one*, *all the same*, *al-together*), and used in all the historical senses of So, demonstrative, antecedent, and relative. It was, first as a relative, and then as antecedent, shortened through *alsē* (*ase*), *als*, to As, which now always fulfils the relative function, and shares with the original *so* the antecedent function; thus, *as* good *as* this, not *so* good *as* that. As a demonstrative, its force has been weakened from *wholly so*, *just so*, through *in the same way*, *likewise*, to *eke*, *too*. For this weakened sense there was in the 15th c. a tendency, developed in the north into an established usage, to employ the weakened form *alse*, *als*, but this has been resisted in standard English, where the full *also* is retained in this, now the only current sense. Not common in 16th c.; Shaks., according to Schmidt, has it only 22 times. See As.]

Fr. *ambassade*, 15th c. *ambaxade*, ad. OSp. *ambaxada* (mod. *em-*), cogn. w. Pr. *ambaissada*, It. *ambasciata*, OFr. *ambassée*, (superseded by this form in -ade; see Embassy):—L. **ambactiāta* (found in med.L. as *ambaxiāta, -asciāta, -assiāta, -asiāta*), ppl. derivative of **ambactiāre* to go on a mission, f. *ambactia, ambaxia* (in Salic and Burgundian Laws) 'charge, office, employment,' n. of office f. *ambactus* a servant (? vassal, retainer). The OFr. form *ambassée* was also adopted in Eng. as Ambassy, Embassy; as was also the med.L. as Ambassiate, etc., the forms of which appear to have been quite mixed up with those of the present word, leading to the pronunciation in 5-6 *amba·ssiade, amba·ssade*, and the spellings in *-ad, -ed, -et*. But Shakspere and subseq. writers have *ambassir·de* or *a·mbassade*.

The origin and meaning of *ambactus* have given rise to much discussion. According to Festus '*Ambactus* apud Ennium lingua Gallica *servus* appellatur'; and Caesar (*B. G.* VI. 15) applies it to the vassals or retainers of a Gallic chief. Henze Zeuss and Glück identify it with Welsh *amaeth, amaethu*, (for **ambaeth*) 'husbandman, tiller of the ground,' perh. orig. 'tenant, retainer,' or even 'goer about, footman.' Grimm finds the origin in OHG. *ambaht*, Goth. *andbahts* servant, retainer, OE. *ambeht*, ON. *ambátt* (cf. Ansout), variously explained as f. *and* against, towards + *bah* Back, or **bah* to do, or **bahti* = Skr. *bhakta* devoted, and assumed to have been adopted in Gallic, or erroneously taken as Gallic by Festus. But the majority of etymologists consider the Teut. word to be an adaptation or refashioning of the Lat. or original Celtic. For the latter, Mahn (*Etym. Unt.* 145) has also proposed *ambi* (*amb-, amm-, am-*) about + Breton *abatus, abadus* 'busy,' hence 'one employed about (his lord).']

Fr. *ambassadeur* (15th c. also *ambaxadeur*), ad. OSp. *ambaxador* (now *emb-*) and Pr. *ambaxadeur*), cogn. w. It. *ambasciatore, -dore*, and OFr. (superseded by this adopted form) *ambasseur* (*ambascor, -asseor, -axeur*, etc.). The innumerable early variants are chiefly adoptions or adaptations of the med.L. prop. **ambactiātor* (agent-noun f. **ambactiāre*; see Ambassade), but found as *ambaxi-, ambasci-, ambassi-, ambasi-ator, -itor*; also with initial *e* and *i, embassiator, imbassiator*, etc.; varied with crosses between these and the Fr., and phonetic forms like *embassader*. Of these variants *embassador*, supported by *embassy*, was much more common than *ambassador* in 17-18th c., and is still the common spelling in United States.]

The form *amyse, amice*, is not satisfactorily accounted for; the *s* may be due to an early confusion of *amyte* with the next word (OFr. *aumusse*); to a med.L. *amicia* (see Ducange) ?for *amitia*, f. OFr. *amit*; or to one of the OFr. forms (Burguy has '*amit, amict, amis*,' Littré '*amist*'). Wyclif translates *amictus* once *amyt*, once *amys*, but has also *amyt* for *capitium* 'hood,' where the sense seems to be *aumusse*, Amice[2], showing already a confusion between the two words. In Caxton, and in 18th c. writers, we find Amict.]

But at that time . . as now by the clergy of the church of Rome, the amice was only placed for an instant upon the top of the head, and then lowered upon the shoulders, to be left there, and adjusted round the neck. So that the use of it became merely symbolical. 1896 J. H. Newman *Callista* 260 The neck was bare, the amice being as yet unknown.

Ger. *mutze, mütze*, cap (Sc. *mutch*), with Arab. article *al-* prefixed, as in some other non-Arabic technical words. The earliest examples in Eng. show confusion with the prec. word, the likeness between the Eng. adaptations of Fr. *aumusse* and *amit*, being assisted by the apparent similarity of use between the two articles; and from the 17th c. this has been distinguished from the prec., only as the *grey amice*.]

Amide (æ·maid, ămi·d; the latter always in comb.). *Chem.* [f. Am(monia) + -IDE.]

†**1,** *orig.* A name given to the first-discovered derivatives of ammonia (NH_3), in which one atom

of H was exchanged for a metal or organic radical, acid or basic; these being viewed as compounds of the *metal*, etc. with a hypothetical radical *amidogen*, NH_2. (Since the discovery of the actual relations of these 'amides' to the 'imides' and 'nitriles,' the compound ammonias have been rearranged according to the nature of the replacing radical, as *amides*, *amines*, and *alkalamides*. The present sense of 'Amide' is therefore at once wider and more restricted than the original. See next.)

1850 Daubeny *Atom. The.* viii. (ed. 2) 237 Compounds of NH_2 have been hitherto called amides.. but this name will probably be now discarded. 1864 Scoffern in *Ort Circ. Sc., Chem.* 503 Others believe it to be an amide of metallic silver. 1863 Watts *Dict. Chem.* (1872) I. 169 [Potassamine] was regarded as a compound of NH_2 (*amidogen*) with potassium, NH_2K, and called *amide* of potassium, analogous to the cyanide CNK. In process of time, compounds came to be discovered . . in which 2 or 3 atoms of hydrogen were replaced by metals or compound radicles, to which the name amide in its original sense of a compound containing amidogen, NH_2, was plainly inapplicable; accordingly these compounds were designated by other names *imides*, *nitriles*, &c.

2. *Mod. Chem.* Generic name of the compound ammonias derived from one or more molecules of common ammonia (NH_3), by exchanging 1, 2, or all 3 hydrogen atoms for acid radicals of equivalent adicity.

According to the number of ammonia molecules represented, they are denominated *Monamides*, *Diamides*, *Triamides*, &c., all of which may be *primary*, *secondary*, or *tertiary*, according as ⅓, ⅔, or the whole of the hydrogen is replaced. The nature of the replacing radicals (or related acids) is shown by prefixing their names (contracted), as *Acet-amide*, *Tri-acet-amide*, *Ox-amide*, *Succin-amide*, *Cyan-amide*, *Phosph-amide*, *Phenyl-ti-benz-amide*. *Primary* amides may be viewed as formed from organic acids by substituting one atom of amidogen (NH_2) for one of hydroxyl (HO); they form one half of the earlier 'amides' in sense 1, the other half being now Amines. The *secondary* and *tertiary* amides are the acid members of the former 'imides' and 'nitriles.'

1863 Watts *Dict. Chem.* (1872) I. 169 Ammonias in which 1 or more atoms of hydrogen are replaced by an *acid*-radicle: to this division we propose to confine the name of 'amides.' *Ibid.* 170 Primary amides are mostly solid and crystalline, easily fusible, neutral to test paper, volatile without decomposition. 1879 *Syd. Soc. Lex.* s.v., Most of the nitrogenous animal bases are amides.

3. Extended to compounds intermediate between amides proper and Amines: see Alkalamides.

4. *Acid amide*: a body uniting the types of an amide and an acid, also called Amic or *Amidic acid*, and Alanine, q.v. *Amide-base*: earlier name for a primary Amine.

Amidic (ămə·dik), *a. Chem.* [f. Amide + -ic.] Of or derived from an amide; as in *Amidic acid*, the same as acid amide, or amic acid.

1877 Watts *Fownes' Chem.* II. 379 The acid amides thus formed [by replacement of the alcoholic hydroxyl] are called amic or amidic acids.

Amidide (æ·midəid). *Chem.* [f. Amide + -ide.] A simple compound of amidogen with another element or complex radical.

1854 Pereira *Mat. Med.* (ed. 4) I. 437 The amidide of hydrogen (ammonia). 1869 *Eng. Mech.* 19 Mar. 581/3 It was proposed to regard the two molecules.. as an amidide of ammonium NH_4, NH_2.

Amidin (æ·midin). *Chem.* [f. *amid-* the common Romanic form of L. *amyl-um* starch (as in Fr. *amid-on*, etc.) + -in.]

1. The soluble matter of starch found in the interior of the granules.

1833 *Penny Cycl.* I. 452 One hundred parts of potato starch .. yielded 17 of amidine, 30·4 of sugar, 17·2 of gum, and some unaltered starch.

2. Starch in a state of solution, gelatinous and transparent.

1839 Hooper *Med. Dict.* 84 Caventou says that the amidine is formed at once by the action of the hot water on the starch. 1879 in *Syd. Soc. Lex.*

Generic name of the *compound ammonias*, in which one or more of the three hydrogen atoms in ammonia, NH_3, are exchanged for alcohol or other positive radicals, as methyl, ethyl, phenyl, or for a metal, as potassium, platinum, zinc.

They are distinguished as *Monamines*, *Diamines*, *Triamines*, according to the number of ammonia molecules represented in the molecule of the compound; each of which may be *primary*, *secondary*, or *tertiary*, according as ⅓, ⅔, or the whole of the hydrogen is replaced. The nature of the replacing radical or eler
in primary amines,
amine, *Platinamine*, *Potassamine*, *Zincamine*; or, in secondary and tertiary amines, in the case of two or three replacements by the *same* radical, *Di-ethylamine*, *Tri-potassamine*, or by *different* radicals as *Methyl-ethylamine*, *Dimethyl-ethylamine*: NH_3, in which 2 atoms of H are replaced by methyl, and 1 by ethyl), *Methyl-ethyl-amylamine* (containing one atom each of methyl, ethyl, and amyl, in union with the nitrogen of the original ammonia). *Primary* amines were originally included under Amides in the earlier sense; they may be represented as derived from the paraffins by substitution of amidogen, NH_2, for hydrogen, or from the alcohols by substitution of amidogen for hydroxyl.

†**An**, *adj.*¹ Earlier form of the numeral ONE; retained in the north. The OE. *ān* began *c* 1150, to be reduced bef. a cons. to *a*; in the south, *ān, ā* were, bef. 1300, regularly rounded to *ōn* (*oon, one*), *ō* (*oo*) in the full original sense of the numeral; but when the sense was weakened to that of the 'indef. article' (see next) they continued to be written *an, a* (*ān, ā*). In the north, the spelling *an, a*, was retained in both senses, the stress alone (as in Ger. *ein*, Fr. *un*) distinguishing the numeral from the article; and *an* was at length commonly written *ane*, which spelling, though proper to the numeral (*ane* = *ān*, with *e* mute indicating long vowel), was, especially by Sc. writers, used for the article also. See ANE, A *adj.*², and, for the senses, ONE; the following instances illustrate the form only.

An (*toneless* ăn, ən; *emph.* æn), *adj.*², 'indef. article.' The older and fuller form of *a*, now retained only before a vowel sound, as *an* orator, *an* honour, *an x*, *an* 'M.P.'; also by most writers before *h*, and by some even before *eu, ū* (= *yū*), in unaccented syllables, as *an hyæna, an euphonic change*, though many writers, and most speakers, now use *a* in such positions. *An* originated as a lighter or stressless pronunciation of the numeral *ān* 'one'; see above: already by 1150, in midl. dial. it was reduced before a cons. to *a*; but in the south, the fuller *an*, even retaining part of its earlier inflected cases, is found as late as 1340. *An* was often retained before *w* and *y* in 15th c., as *an wood, an woman, an yere, such an one*, and was regular before *h* down to 17th c., as *an house, an happy, an hundred, an head* (1665). Its history thus shows a gradual suppression of the *n* before consonants of all kinds, and in all positions. For illustrations, and signification, see A *adj.*²

1. = AND, B. (L. *et*.)

In this sense the weak form *an* appears soon after 1100, and is not uncommon in ME., esp. northern, but very rare after 1500, till it reappears in modern times in the representation of dialect speech, in which it is printed *an'* with the apostrophe, recognizing the dropped letter. But *and* is almost always so pronounced in conversation, and even in reading, though this is conventionally considered a fault.

2. = AND, C. = *if*. (L. *si*.) *arch.* and *dial.*

In this sense *an, an'*, is rare bef. 1600, when it appears occasionally in the dramatists, esp. before *it*, as *an' 't please you, an' 't were*, etc. As the prec. sense was not at this time written *an*, modern writers have made a conventional distinction between the two forms, *an'* for 'and,' L. *et*, being dialectal or illiterate, but *an'* or *an* for 'and,' L. *si*, archaic, or even literary. Except in *an' 't, an* is found only once in the 1st Folio of Shakspere (see below); but modern editors substitute it for the full *and* usual in Shakspere and his contemporaries. Dialectally the two senses are alike *an'*; the intensified *and if, an if*, common in 17th c., remains in the s.w. dial. as *nif*.

Goth. and OHG. *ana* (MHG. *ane*, mod.G. *an*), OS., OFris. *an*, ON. *á*; Gr. ἀνά.] The orig. form of the prep. which, in prehistoric Eng., in accordance with the regular phonetic history of short *a* before nasals, was rounded to ON, a form, unlike the parallel *ond, hond, lomb, monn*, ever after retained. In Anglo-Saxon, but not in Anglian, *on* also absorbed the prep. *in*. As to its history in combination, see AN- *pref.* 1 below. After 11th c. when *on-* in comb. was generally reduced to *a-* bef. cons., *an-* bef. vowel, the same befell *on* prep. to some extent, esp. in familiar phrases, as *an edge, an end, an erthe, an even* (at eve), *an high, an hand, an horseback*: see A *prep.*¹ But in course of time all these were altered back to *on*, or changed to *in*; *an* being retained only in those in which its prepositional character was no longer apparent, as to go *an* (now *a*) hawking, twice *an* hour. The following quotations illustrate the forms; for the various uses, see A *prep.*¹ See also AN-AUNTER, AN-END, AN-ERTH.

An-, *prefix*, from various sources.

1. OE. and ME. an-, = AN *prep.* (see prec.) In OE. the orig. *an-* remained only under the stress, i. e. in sbs.; otherwise, it was, like the separate preposition, rounded to *on-*; thus *angin* beginning, *onginnan* to begin, *onbiddan* about. An example of the former remains in ANVIL. In ME. *on-* was regularly levelled to *a-* (A- *pref.* 2); before a vowel (rarely bef. cons.) *an-*, as in *anelen, aninne, anoven, anunder, anuppe, anhigh, anblow, anlike*. Most of these are now obs.; a few remain with *an-* conformed to the prep. *on*, as *on high*; levelled to *a-* as *alike*; or assimilated to Fr. *en-*, as (?) *enamel*. Only where the individuality of the prefix has been lost, does *an-* remain, in *anon, anent, an(n)eal* (OE. *on-ælan*, ME. *an-ele(n)*).

2. ME. an-, reduced f. OE. *and-* 'against, towards, in return for': see AND-.

3. ME. an-:—OE. *dn* one, retained in early ME., and subseq. in north. dial., in words now written with *on-, one-*, or obs.; as *ankenned, anfald, anhad, anlepy, anly* (= ONLY), *anmod, anred, anwill*.

4. ME. an-, = Anglo-Norm. *an-*, OFr. *en-*:—L. *in-*, = 'in, into,' as ANOINT (L. *inunctum*), AN(N)OY; *anhaunse, anjoin, anvenime*, where subsequently spelt *en-*; *andetted*, subseq. *endetted, indebted*; *anpayre*, subseq. *apayre*, also *enpayre, empayre, impair*.

5. ME. an-, for earlier *a-* = OE. *a-* (A- *pref.* 1), or OFr. *a-*:—L. *ab-, ad-, ex-, ob-*, which, being phonetically identified with No. 1 above, was like it expanded to *an-* bef. vowels, and occas. bef. consonants: as in *a(n)chesoun* = oc-casion, *a(n)ferm* af-firm, *a(n)ired, a(n)oure* ad-ore, *a(n)orn* ad-orn, *a(n)tempered* at-tempered; *a(n)s-ample* ex-ample. Such of these as survived were either refashioned after L., as *adorn*, or changed *an-* to *en-, in-*, as *inorn*; *example, ensample*, shows both processes.

6. ME. **an-**, a later spelling of earlier *a-*, = OFr. *a-* :—L. *an-* assimilated form of *ad-* 'to,' when followed by *n-*, after L. forms or supposed analogies, as in *a(n)nounce*. This doubling of the *n* began in 14th c. Fr. and extended to Eng. in 15th c. In 16th c. it was ignorantly extended even to words containing *an-* from other sources, from which it has generally been again ejected exc. in ANNEAL, ANNOY. See AD-.

7. **an-**, repr. L. *an-* = *ad-* before *n-*, in words derived from L. directly, or indirectly through later Fr., and in words formed on the analogy of them, as *an-nex, an-nul, an nunciation*.

8. **an-**, repr. L. *an-* before certain consonants, for *am-, amb-, ambi-* 'on both sides, about.' Through OFr. in *an-(h)ele*; directly from L. in *an-cipitous, an-fractuous*.

9. **an-**, repr. Gr. *ἀν-* for *ἀνά* 'up, upwards, back, etc.' (see ANA-) bef. vowel, as in *an-agoge*, Gr. *ἀναγωγή*; also in *an-chor*[2], *an-choret*.

10. **an-**, repr. Gr. *ἀν-* privative, 'not, without, wanting' (reduced before consonants to *ἀ-*: see A- *pref.* 14), cognate w. Skr. *an-*, L. *in-*, Eng. *un-*, 'not, non-.' In words already formed in Greek as *an-archy, an-arthrous*; whence common in modern scientific words as *an allagmatic, an-alphabetic, an-antherous, an-isomerous*.

-an, *suffix.* I. Derivative. **1.** repr. L. *-ānus, -āna, -ānum* 'of, or belonging to'; as *castellān-us, oppidān-us, pāgān-us, urbān-us, silvān-us, Africān-us, Rōmān-us, Sullān-us, Justiniān-us*. In OFr. this became *-ain*, or (after *i*) *-en*, as *chastelain, Romain, payen, Italien*; and so originally adopted in ME., but subseq. refashioned after L. as *-an*, and so in all words formed in Eng. direct, or adopted from the mod. langs. (It. Sp. Pg. *-ano*, Fr. *-ain, -en*.). Esp. added to proper names; 'belonging to a place' as *American, Chilian, Russian, Oxonian*; 'following a founder,' as *Arminian, Lutheran, Mohammedan, Linnæan*, or 'a system,' as *Episcopalian, Presbyterian, Anglican, Gallican*; and, in Zoology, to names of divisions, 'belonging to a class or order,' as *mammalian, reptilian, crustacean, arachnidan, acalephan*. Primarily these are all adjs., but as in L. etc., all may be used subst., and with some this is the more frequent use. The zoological words supply singulars to the collective plurals in *-a*, as *a crustacean* = a member of the *Crustacea*. Already in L. this termination was often added to others, to *-i-us* so commonly that *-iānus*, -IAN, is in use merely a euphonic variety of *-an*; cf. *Corinth-i-an, Rom-an, Christ-i-an, Mohammed-an*.

2. in *Chem.* for *-ane*, arbitrary ending proposed by Davy for names of chlorides containing one atom of chlorine, as in *azotan* obs. In some words *-an* is a meaningless formative as *allox-an*.

†II. Inflexional. **1.** In OE., ending of oblique cases, and nom. pl. of weak declension. Both became in ME. *-en*, now rarely preserved in pl., as *ox-en* :—OE. *ox-an*. Hence (dat. or loc. sing.) in advb. or prep. forms like *ut-an, abut-an, befor-an*, ME. *uten, abuten*, and *ute, abute*. Now obs.

2. In OE., ending of pres. inf. of vbs., levelled in ME. to *-en, -e*, and now lost, as OE. *writ-an, send-an*; ME. *writ-e(n, send-e(n*; mod. *write, send*.

Equivalency or likeness of relations; 'resemblance of things with regard to some circumstances or effects' (J.); 'resemblance of relations' (Whately); a name for the fact, that, the relation borne to any object by some attribute or circumstance, corresponds to the relation existing between another object and some attribute or circumstance pertaining to it. Const. *to, with, between.*

This is an extension of the general idea of proportion from quantity to relation generally, and is often expressed proportionally, as when we say 'Knowledge is to the mind, what light is to the eye.' The general recognition of this analogy makes *light*, or *enlightenment*, or *illumination*, an *analogical* word for *knowledge*.

7. *Logic.* a. Resemblance of relations or attributes forming a ground of reasoning. b. The process of reasoning from parallel cases; presumptive reasoning based upon the assumption that if things have some similar attributes, their other attributes will be similar.

DAVIES *Metric Syst.* III. 176 The analogy of all experience warrants the conjecture. 1875 STUBBS *Const. Hist.* I. i. 11 Analogy, however, is not proof, but illustration.

8. *Language.* Similarity of formative or constructive processes; imitation of the inflexions, derivatives, or constructions of existing words, in forming inflexions, derivatives, or constructions of other words, without the intervention of the formative steps through which these at first arose.

Thus the new inflexion *bake, baked, baked* (instead of the historical *bake, book, baken*) is due to analogy with such words as *rake, raked, raked*, etc. When the formative steps are not only absent, but could not have been present, the process is often called *False Analogy*; as when *starvation* was formed to bear the same relation to *starve*, that *vexation* does to *vex*. *Vexation* being historically due to the existence of *vexāt-* the ppl. stem of a L. vb. *vexā-re*, whence through Fr. *vexe-r* we have *vex*, there could be no such formative steps in the case of the Teut. vb. *starve*. But as all mere analogy, even that of *vex-es, vex-ed, vex-ing*, is in this sense 'false,' the term *form-association* is now commonly used of an analogical process which considers the mere *forms* of existing words, apart from their history.

Soc.* (1877-9) 392 Paul goes on to protest against the epithet 'false' analogy, remarking that it is really 'correct,' working as it does with unerring psychological instinct.

9. *Nat. Hist.* Resemblance of form or function between organs which are *essentially* different (in different species), as the analogy between the tail of a fish and that of the whale, the wing of a bat and that of a bird, the tendril of the pea and that of the vine.

1824 SIR H. DAVY *Agric. On Greek analogies the vb. would have been *analysize*, Fr. *analysiser*, of which *analyser* was practically a shortened form, since, though following the analogy of pairs like *annexe, annexe-r*, it rested chiefly on the fact that by form-assoc. it appeared already to belong to the series of factitive vbs. in *-iser*, Eng. -ize, = L. *-izāre*, f. Gr. *-ίζ-ειν*, to which in sense it belonged. Hence from the first it was commonly written in Eng. *analyse*, the spelling accepted by Johnson, and historically quite defensible. The objection that this assumes a Gr. *ἀναλύς-ειν* itself assumes that *analyse* is formed on Gr. *ἀναλύσ-ειν*, which is etymologically impossible and historically untrue.]

Anathema Maranatha (mærăn·ăˈpăˈ). [Gr. *ἀνάθεμα* a thing accursed; *Μαρὰν ἀθά* = Syriac ܡܪܢ ܐܬܐ *mārə·n ethā* 'the Lord hath come.' (The pron. ought to be mărə·năˈthă·.)] These words occur together in *1 Cor.* xvi. 22. According to modern criticism, *Maran atha* is a distinct sentence having no connexion with *Anathema*; but in earlier texts of the Greek it was connected with it and the connexion variously explained; hence *Anathema Maranatha* has been taken as a portentously intensified form of *Anathema* in its various senses.

-ance, *suffix*; a. Fr. *-ance*:—L. *-ānt-ia, -ēnt-ia, -ent-ia* (see -ence), all of which in words that survived into Fr., or were formed in Fr. as nouns of action, on the pres. pple., were levelled under *-ance*. But other L. words of this form, subseq. adopted in Fr., took *-ence* or *-ance*, according to L. spelling. Thus of popular preservation or formation, *aidance, assistance, complaisance, nuisance, parlance, stance*; of later learned adoption from L., *absence, clémence, différence, diligence, providence, prudence*, as well as *élégance, tempérance*. Words of both classes were adopted in Eng. in their actual Fr. forms, which they still generally retain. But, since 1500, various words orig. in *-ance* from Fr. have been altered back to *-ence*, after L.; and all words recently adopted from L., directly or through mod.Fr., or formed on L. analogies, have taken *-ence* or *-ance* according to the L. vowel. Hence, mod.E. words in *-ance* partly represent L. *-ānt-ia*, but largely L. *-entia, -ēntia*, through OFr. *-ance*; partly also mod.Fr. *-ance* from vbs. of various origin. On the other hand, OFr. *-ance* :—L. *-entia, -ēntia*, is, in consequence of refashioning, partly represented by Eng. *-ence*. For the confusion and inconsistency which this causes in current spelling, as in *dependance, -dence, resistance, subsistence*, see -ence. As, in many cases, the OFr. vbs. themselves, as well as their derivatives in *-ance*, were adopted in Eng. (e.g. *appear -ance, assist -ance, purvey -ance, suffer -ance*), the suffix became to a certain extent a living formative, and was occas. used to form similar nouns of action on native vbs., as *abid-ance, abear-ance, forbear-ance, further-ance, hinder-ance, ridd-ance*, etc. For meaning, see -ence; and cf. -ancy.

The distinction of nom. and acc. was lost before their adoption in Eng., so that they were, as in contemporary Fr., mere synonyms. In Eng., *ancessour* soon became obs.; *ancestre* became phonetically *ancetre, aun-ceter*, of which the regular mod. form, now dialectal, is *anceter* or *ansster*; but this was disturbed, on the one hand, by writing the termination (after late AFr.) *-our*, latinized in 16th c. to *-or*; and on the other, by spelling with *-s-*, after later Fr., *aun-cestre*. A combination of both gave the 16th c. spelling *auncestour, -or*, now *ancestor*, in which the *-s-* has come to be pronounced; *auncitor* survived to 17th c. After *ancestre* became restricted in Fr. to the sense of 'progenitor', *ancessour, -eur*, was refashioned after L. as *antécesseur* in the general sense, whence also Eng. Antecessor, and a mixed form Antecestre.]

-ancy, *suffix.* [ad. L. *-antia*, forming abstr. sbs. on ppl. adjs. in *-ant-em* (see -ANT).] A modern Eng. differentiated form of the earlier -ANCE, expressing more distinctly the sense of *quality, state*, or *condition*, often belonging to L. sbs. in *-ntia*, as in *ēlegāntia* 'elegant-ness,' *prūdēntia* 'prudentness,' as distinct from the sense of *action* or *process*, regularly expressed by the Fr. form *-ance*, as in *aid-ance, assist-ance, guid-ance, admitt-ance*. Partly used to form new words, partly to refashion earlier words in *-ance*, expressing quality. If the L. *diligentia, elegāntia, temperāntia, prūdēntia*, were now for the first time adopted as Eng., they would be made *diligency, elegancy, temperancy, prudency*; they owe their existing forms in *-nce*, to the fact that they were adopted from Fr., long before *-ncy* came into use. But many words, once like these, have been refashioned, and now appear with *-ncy*; e.g. *constancy, infancy, piquancy, vacancy*; the modern tendency being to confine *-nce* to action, and to express quality or state by *-ncy*; cf. *compliance, pliancy, annoyance, buoyancy*. For the formation see -ENCY, and cf. -ACY, -CY.

And (ænd, ənd, *famil.* ən, 'n), *conj.* formerly *prep.* Forms: 1- and; also 1 end, ond, 2-5 ant, 3-7 an, 8-9 *dial.* an', 3-4 *occas.* a; but usually expressed by the compendium for L. *et*, in OE. ⁊, later &, & ('*And* per se'), so that it is impossible to tell the full form intended. [OE. shows two forms: (1) *and, ond*(:—OTeut. **anda*) OFris. *anda, and*, OS. *ant*, OHG. *ant*, Goth. *anda-, and*, ON. *and-*, prep. 'against, fronting'; (2) *end*(:—OTeut. **andi*) OFris. *ande, and, an, end, en*, OHG. *anti, enti, inti, unti, endi, indi, unde*, MHG. *unde, und, unt*, mod.G. *und*, Du. *en*, conj.; cf. L. *ante* before, Gr. *ἀντί* against, Skr. (Vedic) *antí* over against, locative of *antá* 'end, boundary, vicinity,' hence 'on the frontier of, abutting on, fronting, facing.' From the idea of opposition, juxtaposition, or antithesis, the word was used in the Teut. langs. to express the mutual relation of notions and propositions. The general Teut. form of the conj. is **andi*, of the prep. **and*(*a*; in OE., with the early loss of *end, and* (*end*) remained for both, but soon became obs. as prep., exc. in a few derivatives: see C. The levelling of OE. *end, end*, under the single form *and* was no doubt helped by the fact that the conj. is nearly always unemphatic, so that the vowel is obscured and tends to sink to a mere voice glide ('nd). From the same cause the final *d* has from early times been often dropped, as now universally in the dialects, and commonly in familiar speech: bread and butter = bread 'n butter. See also AN *conj.*]

C. *conj. conditional*, = If. [This was a common use of MHG. *unde*; the ON. *enda* (which Vigfusson thinks 'probably identical' with *and*, while Sievers would see in it a reduced form of *enn þó*, even though) approached this use, in the latter clause of a conditional premiss, as 'ef þú þorir, enda sér þú nokkut at manni ..' 'if thou darest, and (supposing that) thou art something of a man ..' (Vigf.). It has been suggested that the Eng. use was derived from that of Norse *enda*, but this is very doubtful. More probably the idiom arose in Eng. independently, as in MHG. It may have originated from ellipsis, as in the analogous use of *so*, e.g. 'I'll cross the sea, *so* it please my lord' (Shaks.); cf. 'and it please'; or it may be connected with the introductory *and* in 'And you are going?' A direct development from the original prepositional sense, though *à priori* plausible, is on historical grounds improbable. Modern writers, chiefly since Horne Tooke, have treated this as a distinct word, writing it *an*, a spelling occas. found *c* 1600, esp. in *an't* = *and it*. See An *conj.*]

When proclitic, as in vbs., it was weakened to *on-* as *ongitan* to apprehend. The north preserved the earlier *anent*, still common in north. dial., and in literary and legal Scotch, whence not unfrequent in literary Eng. during the present century. The early form *anende* may have been influenced by the prec. phr. AN-END; *anent, anendt(e*, are not explained. The development of meaning is largely parallel to that of *again, against.*]

1. The indefinite space included between two meeting lines or planes, the shape of which depends upon their mutual inclination; hence in *Geom.* the degree of inclination of two lines to each other, or of one line to a horizontal or vertical base-line.

Hence *Anglo-Saxones*, *Angel-seaxan* = English Saxons, Saxons of England or of the Angul-cynn (*gens Anglorum*, Bæda), as distinguished from the *Ald-Seaxan* (*Antiqui Saxones*, Bæda) or Old-Saxons of the continent. The earliest L. forms were *Angli Saxones*, *Saxones Angli* (two words 'English Saxons'), whence *Angli-Saxones*, and finally *Anglo-Saxones*, *Anglosaxones*. App. of continental origin; in OE. use, rare in the Eng. form; not uncommon in Latin documents down to 1100.]

I. English Saxon, Saxon of England: *orig.* a collective name for the Saxons of Britain as distinct from the 'Old Saxons' of the continent. Hence, properly applied to the Saxons (of Wessex, Essex, Middlesex, Sussex, and perhaps Kent), as distinct from the Angles.

B. *adj.* In this Dictionary, the language of England before 1100 is called, as a whole, 'Old English' (OE.); *Anglo-Saxon*, when used, is restricted to the Saxon as distinguished from the Anglian *dialects* of Old English; thus we may say that *ealdæ* was the Anglo-Saxon (*i.e.* West Saxon and Kentish) form of the normal OE. *ald* (retained in Anglian), whence, and not from *ealdæ*, we have mod.Eng. *old*.

II. Extended to the entire Old English people and language before the Norman Conquest.

For these there was apparently at first no collective name; subsequently, the name *Englisc* (Anglish, English) was extended from the dialect of the Angles (the first to be committed to writing) to all dialects of the vernacular, whether Anglian or Saxon; and *Angul-cynn* (Angle-kin, *gens Anglorum*), and later still, during the struggle with the Danes, 'English and 'Englishman,' to all speakers of the vernacular in any dialect Angle or Saxon. After the Norman Conquest, the natives and the new incomers were at first distinguished as 'English' and 'French,' but, as the latter also became in a few generations 'English' politically and geographically, men's notions of 'English' changed accordingly, so that the 12th c. chroniclers could no longer apply the word distinctively to the people of Edward the Confessor and Harold, for whom therefore they recalled the name 'Saxon,' applicable enough to the West Saxon dynasty, but incorrect when extended to the whole Angle-kin over whom they ruled. At the hands of the Latin chroniclers, often foreigners, to whom the historical relations of Saxons and Angles were not very obvious, a similar extension of meaning had been given to *Anglo-Saxones*. But this name did not reappear in English till after 1600, when, with the revival of OE. learning, historians and philologists again felt the need of distinguishing English 'Saxon' from the Saxon of Germany. The modern use dates from Camden, who himself used *Anglo-Saxon-es*, *-icus*, in Latin, and *English Saxon* in his vernacular works. His translator adapted the Lat. as *Anglo-Saxon*, which gradually displaced 'English Saxon,' first as sb., and finally as adj. also. But it was applied, as *Saxon* had been for 500 years erroneously applied, to 'Old English' as a whole. This has led in turn to an erroneous analysis of the word, which has been taken as = *Angle + Saxon*, a union of Angle and Saxon; and in accordance with this mistaken view, modern combinations have been profusely formed in which *Anglo-* is meant to express 'English and . .', 'English in connexion with . .',

as 'the Anglo-Russian war'; whence, on the same analogy, Franco-German, Turko-Russian, etc. See ANGLO-.

Also called *anhydrous acids*, because they are produced by expelling the water (containing all the hydrogen) from oxy-acids.

1863 Watts *Dict. Chem.* I. 295 Very few triatomic anhydrides are yet known. Phosphoric anhydride, P_2O_5, is the only well known member of this class. 1869 *Eng. Mech.* 9 Apr. 58/2 Sulphuric anhydride SO_3 when added to water, takes up the oxygen to form a new acid radical.
